**Test Case One**

This test case shows how to trigger paypal payment from the application and how Gemini LLM (virtual assistant) acts as virtual assistant for chat moderator (cheer leader) in public live stream. As personal service agent in private chat to update the paypal transaction status. Once the paypal transaction settled, the record will be updated to live transaction ledger from influencer's screen

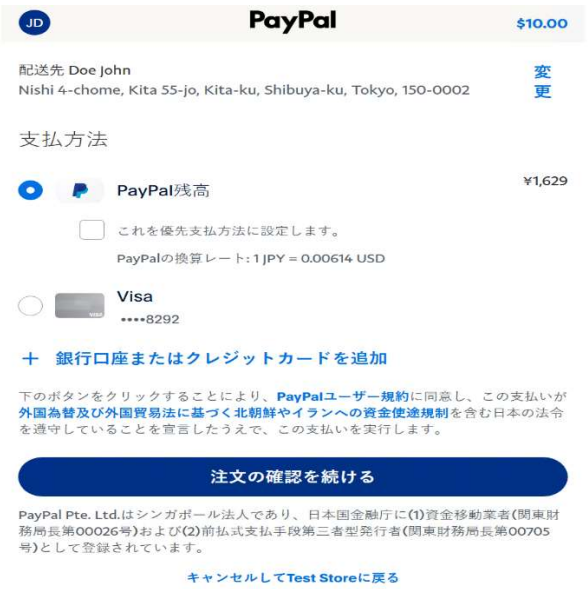

1) Click send flower button

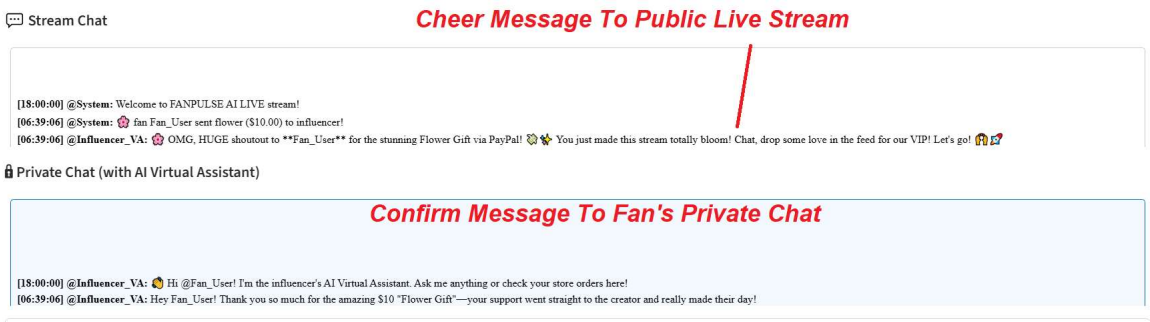

2) Click settle payment via PayPal (the button will only show if gift button pressed or on-line shop order button pressed.

3) Route to PayPal for actual payment

4) Virtual assistant updates message to public live stream chat and private chat. The assistant will cheer the fan for purchasing gift and extra update of payment details will be posted separately by the assistant to private chat.

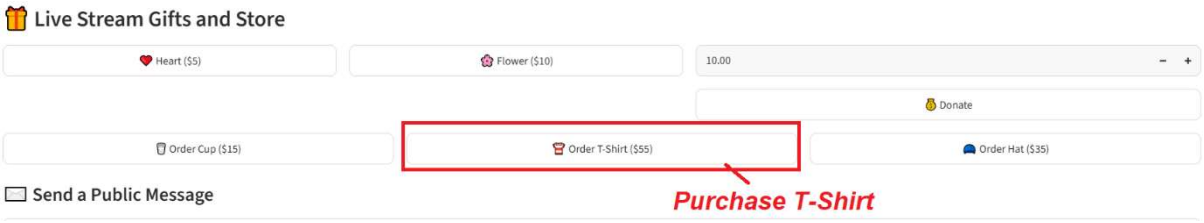

5) Update payment status at live transaction ledger (AG Grid)

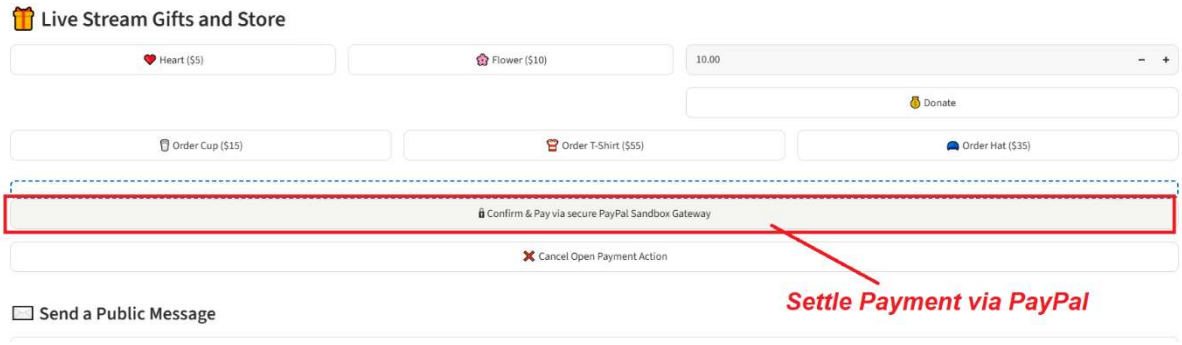

**Test Case Two**

Test Case Two is for purchasing on-line store product T-Shirt, this test case is designed to demonstrate how virtual assistant (LLM) can as a service agent to manage delivery order.

1) Press purchase T-Shirt button

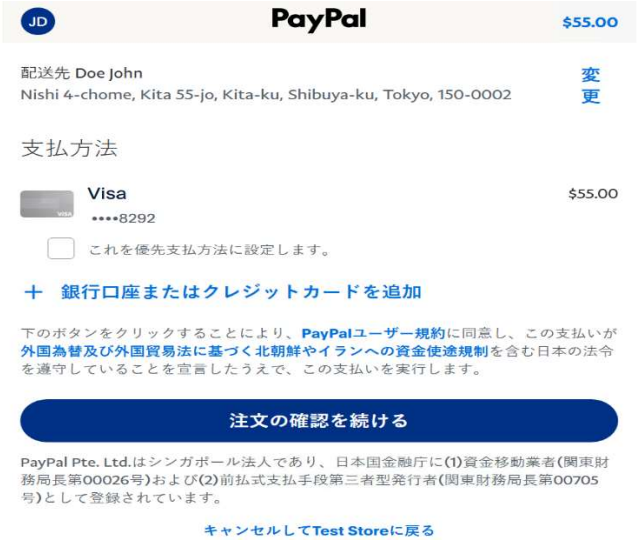

2) Settle payment via paypal

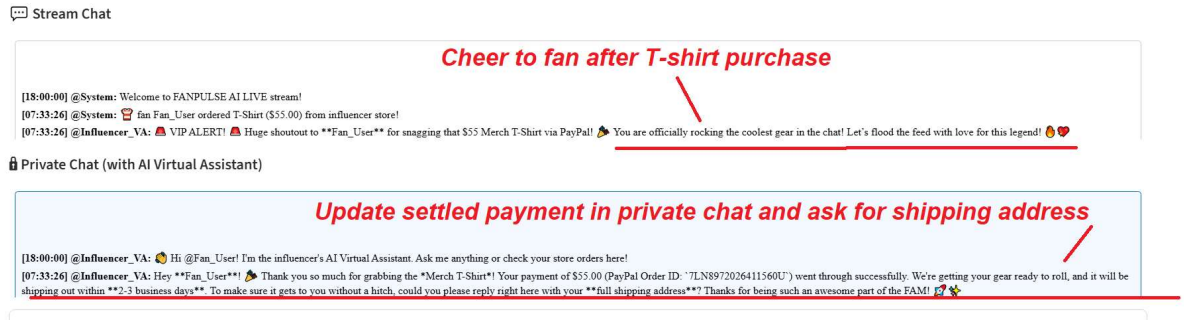

3) Before the payment settle, the live transaction ledger will have pending status

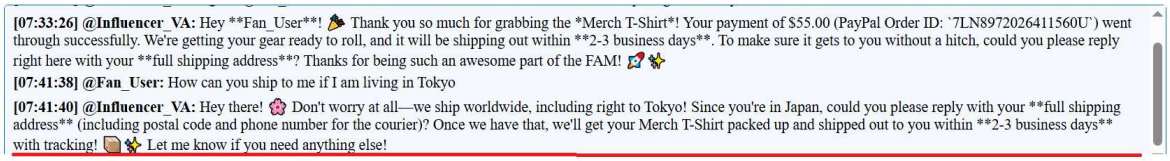

4) Settle by paypal

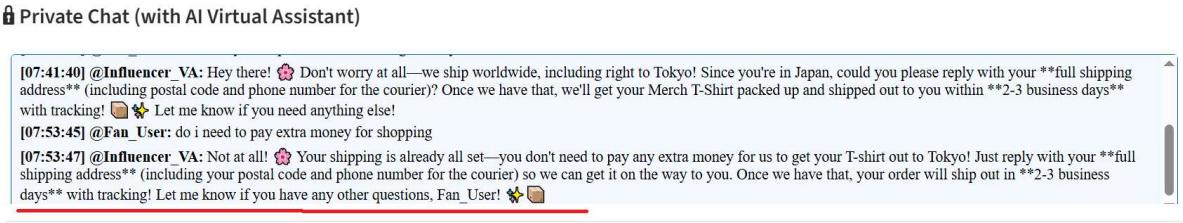

5) Virtual assistant asks for shipping address for delivery

6) This demonstrate how virtual assistant functioning as service agent role (LLM is really running at behind)!!. The fan asks the question, he is living in Tokyo, virtual assistant replies this doesn't matter and full address will ensure the delivery.

7) Next Question, the fan asks whether he needs to pay shipping fee, LLM (virtual assistant) replies the fee has been included

8) The latest transaction has been settled and updated to AG Grid transaction ledger
